Pohjamaalattujen osien maalausohjeet

FI		Hio pohjamaalattu osa kevyesti (P800-P1000). Varo hiomasta pohjamaalia puhki.
		Tarkista osa virheellisten kohtien varalta, korjaa virheet ja hio korjatut kohdat kevyesti (P800-P1000). Pohjamaalaa läpihiotut kohdat uudelleen soveltuvalla muovipohjamaalilla.
		Puhdista huolellisesti silikoninpoistoaineella.
		Tue osa hyvin maalauksen aikana (vääntymisriski)! Maalin lisäys ja käyttötekniikat maalin valmistajan ohjeen mukaan, erityisesti valmistajan määrittämät elastisuutta lisäävät lisäaineet ovat tärkeitä. Materiaalimerkintä näkyy osan sisäosassa (>.....<, esim. >PUR-MF15<).
		Ei polttomaalausta (enint. 40 °C)!
